representing images

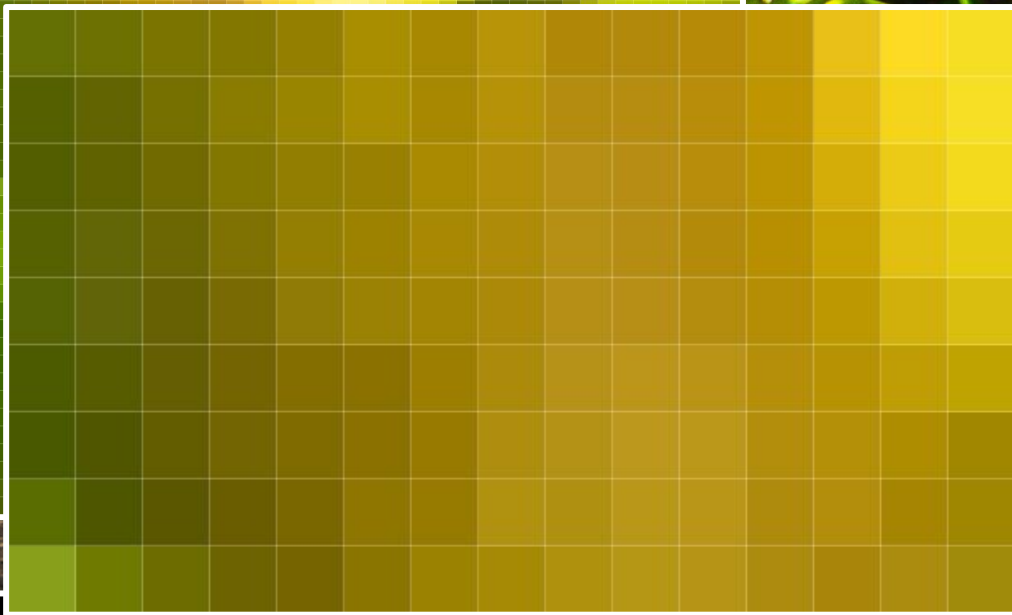

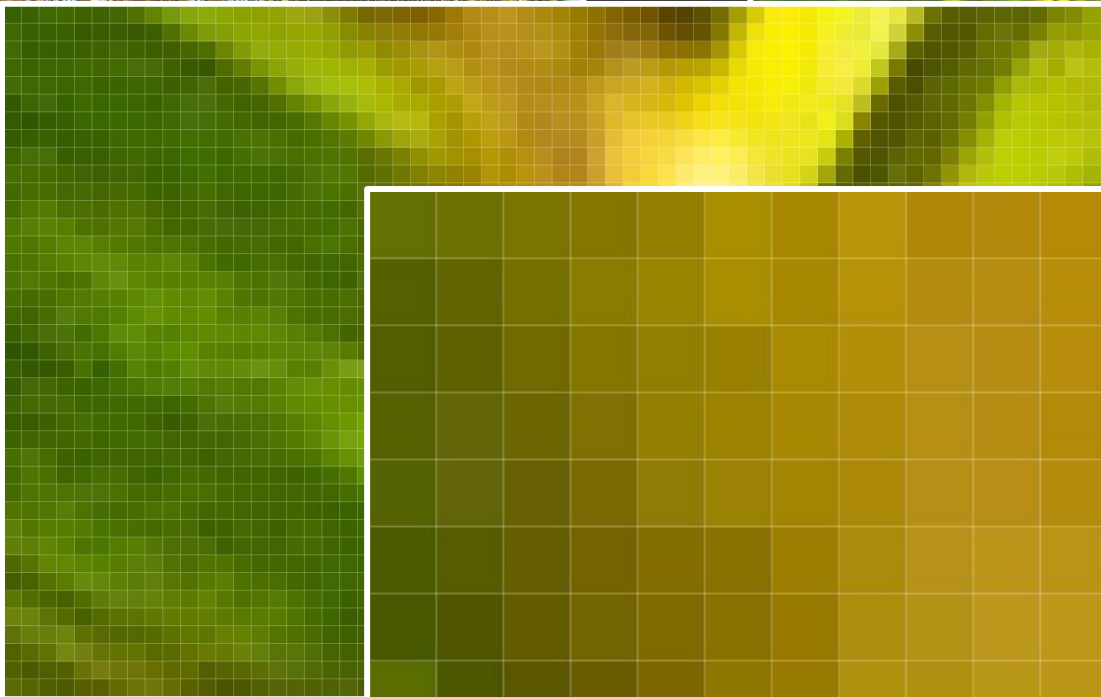

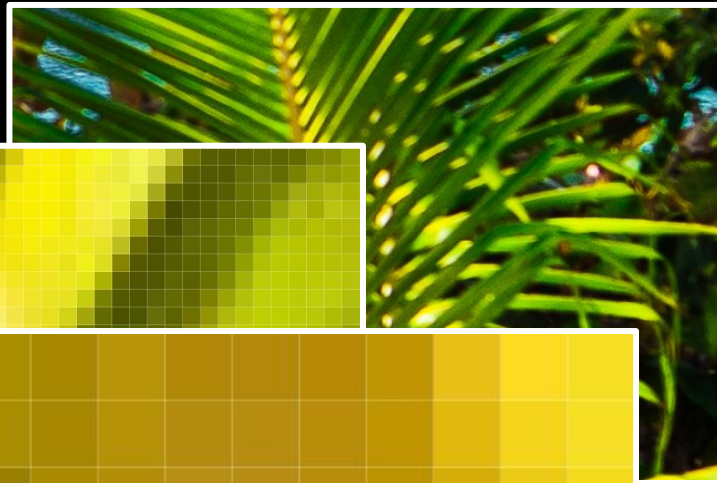

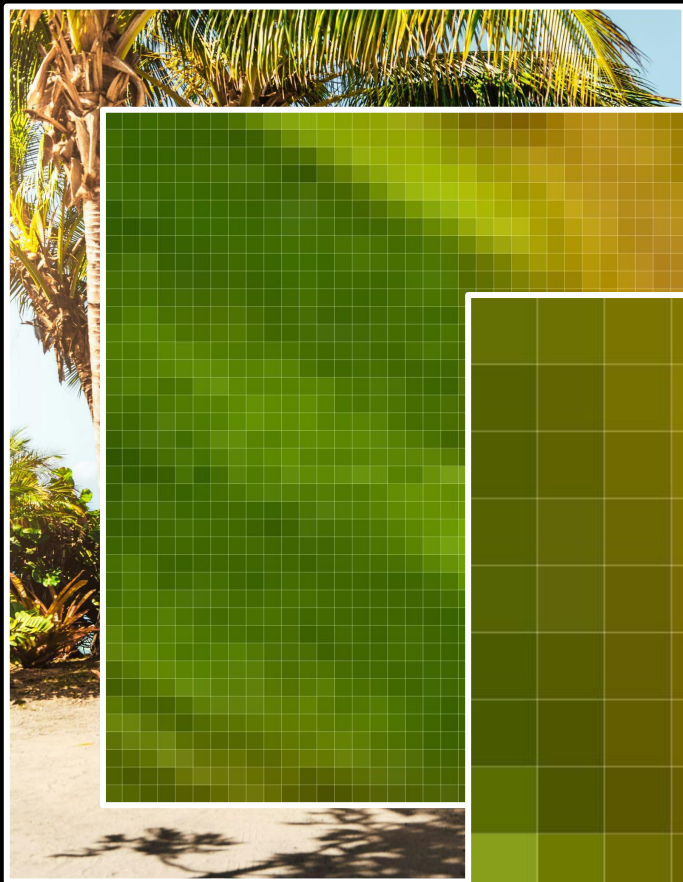

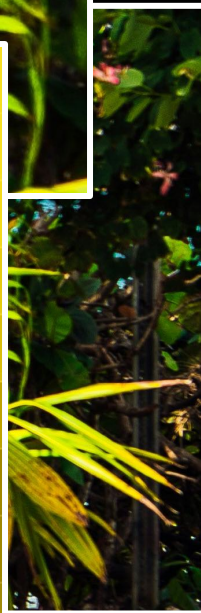

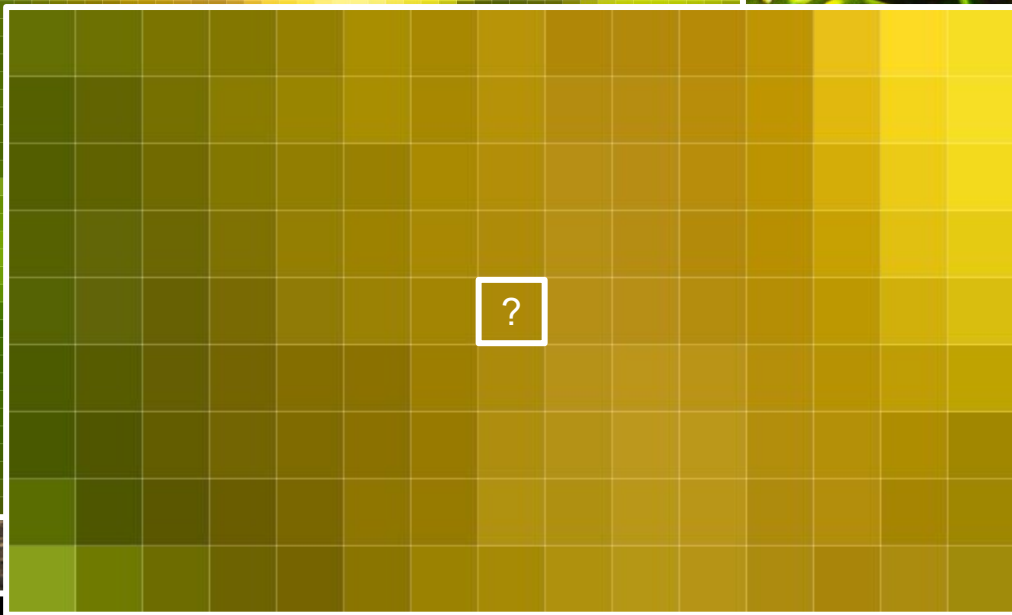

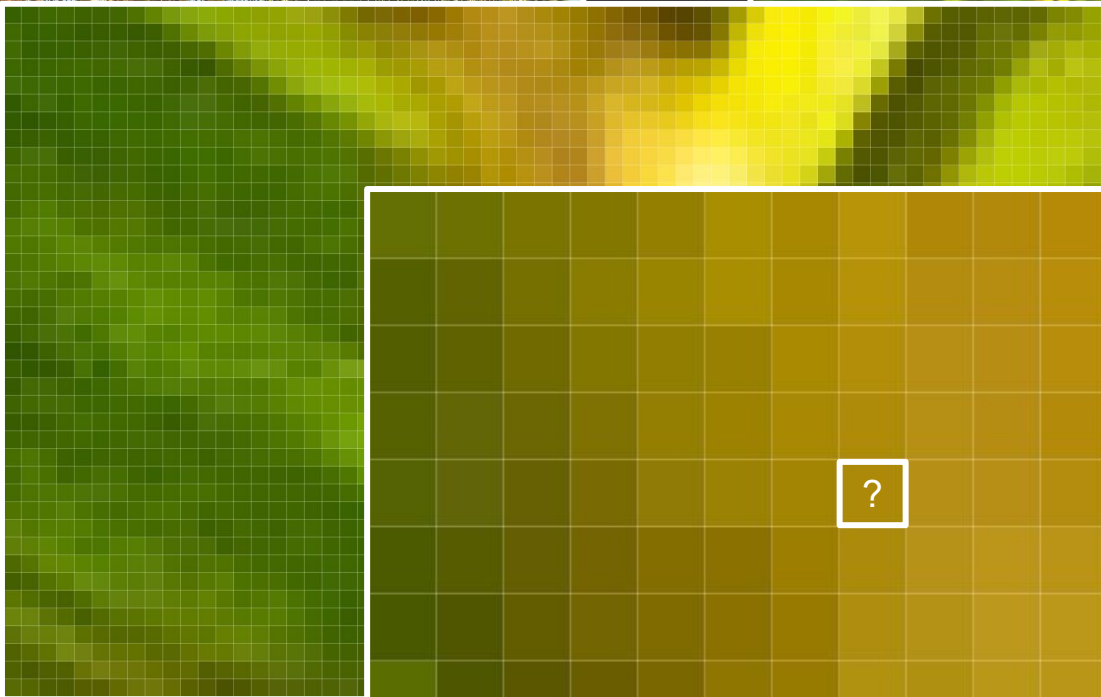

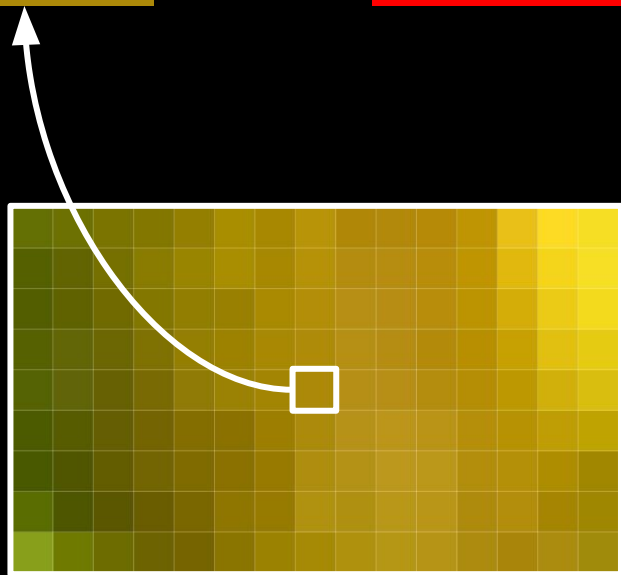

$$\text{[Solid Yellow Box]} = \text{[Red Box with 'R']} + \text{[Green Box with 'G']} + \text{[Blue Box with 'B']}$$

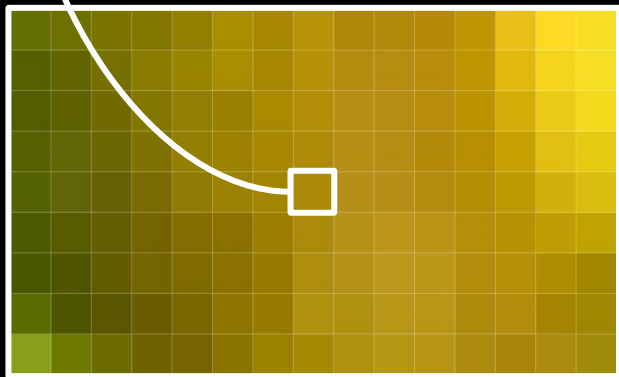

A diagram illustrating the additive color model. On the left is a solid brown rectangle. To its right is an equals sign. Further right are three colored rectangles: red, green, and blue, each containing a white letter (R, G, and B respectively). Plus signs are placed between the red and green rectangles, and between the green and blue rectangles. Below the red rectangle is the number 172, below the green rectangle is 137, and below the blue rectangle is 9.

$$\text{Brown} = R + G + B$$

# possible colors?

R

$2^7$   $2^6$   $2^5$   $2^4$   $2^3$   $2^2$   $2^1$   $2^0$

A red rectangular block representing the Red color channel. Inside the block, the letter 'R' is written in white.

R

A green rectangular block representing the Green color channel. Inside the block, the letter 'G' is written in white.

G

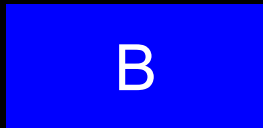

A blue rectangular block representing the Blue color channel. Inside the block, the letter 'B' is written in white.
