“Digitization is the representation of an object, image, sound, document or signal by generating a series of numbers that describe a discrete set of its points or samples”

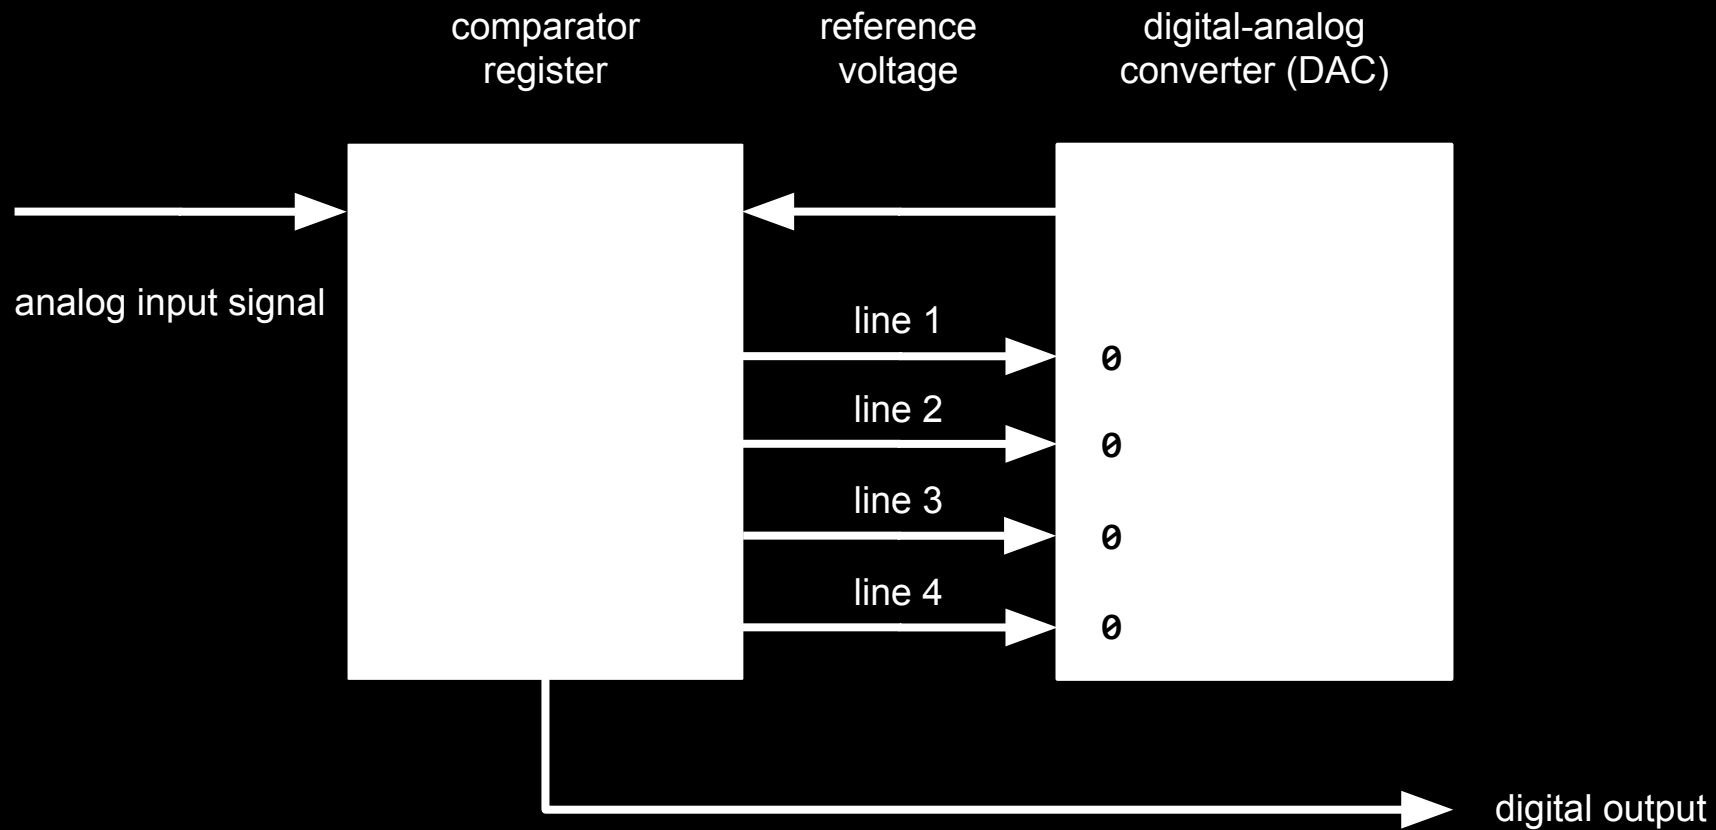

analog-to-digital converter (ADC)

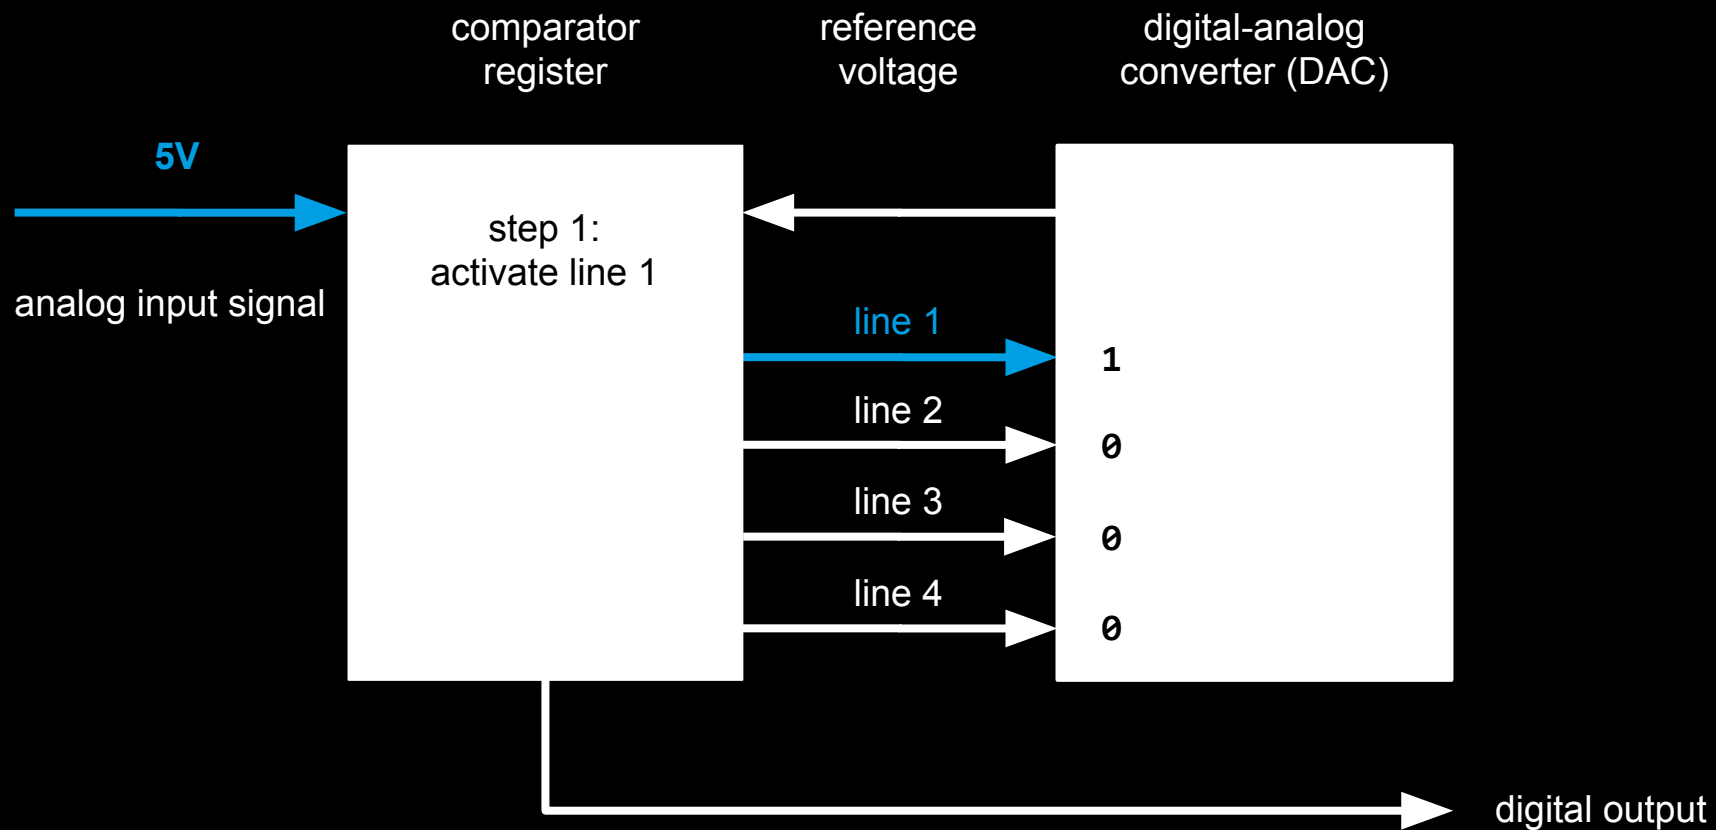

measuring of the
analog signal

turning the
measurement into a
series of 1 and 0

encoding the series of
numbers in binary
and assign meaning

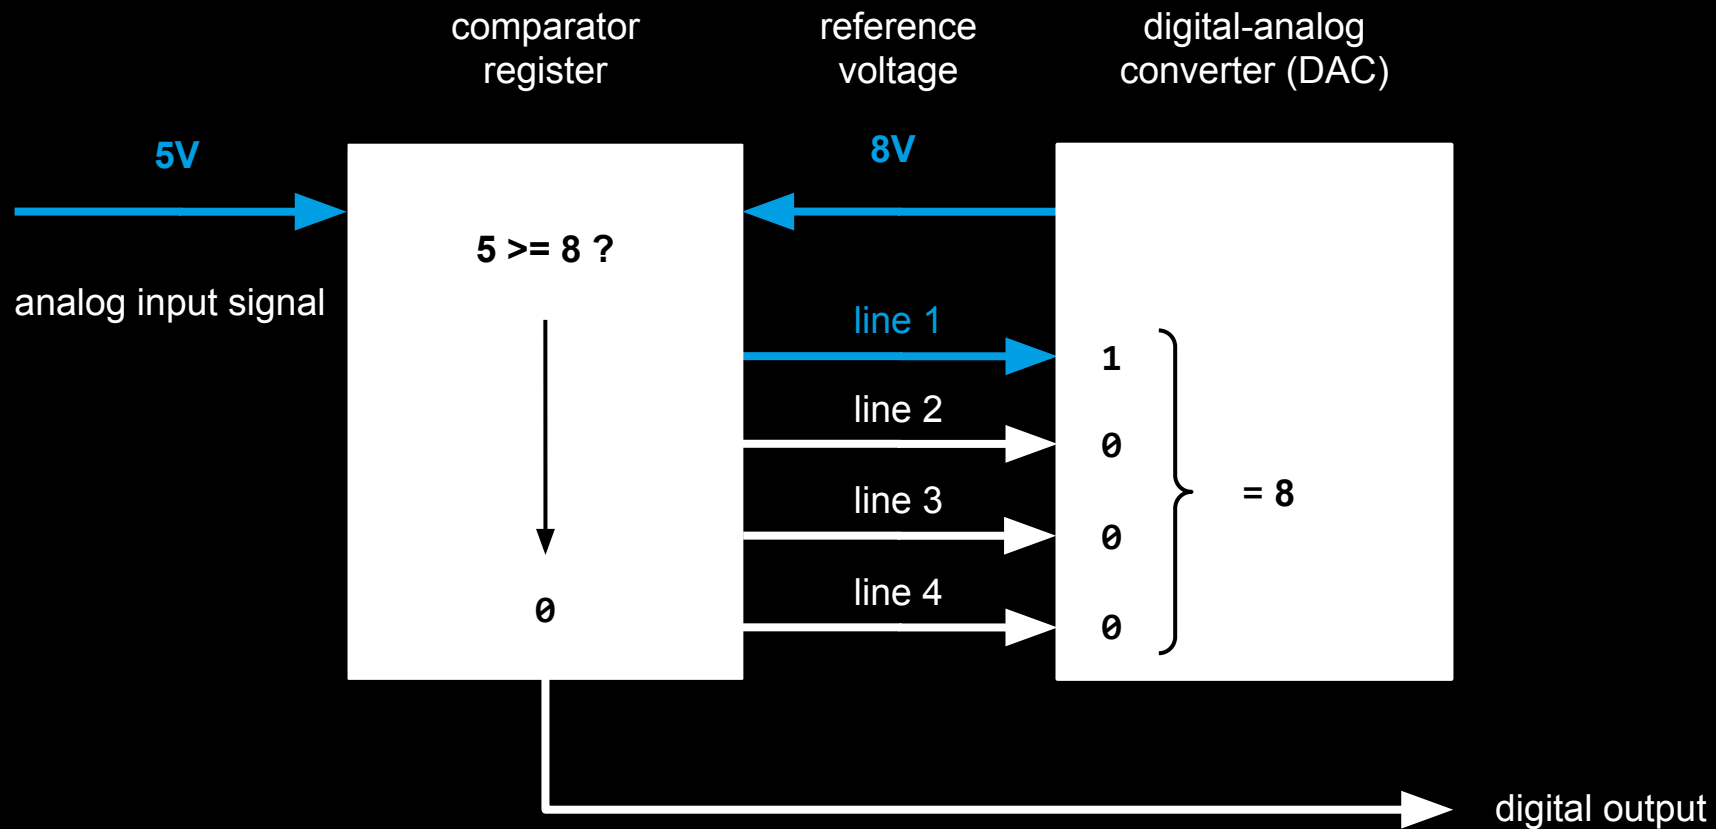

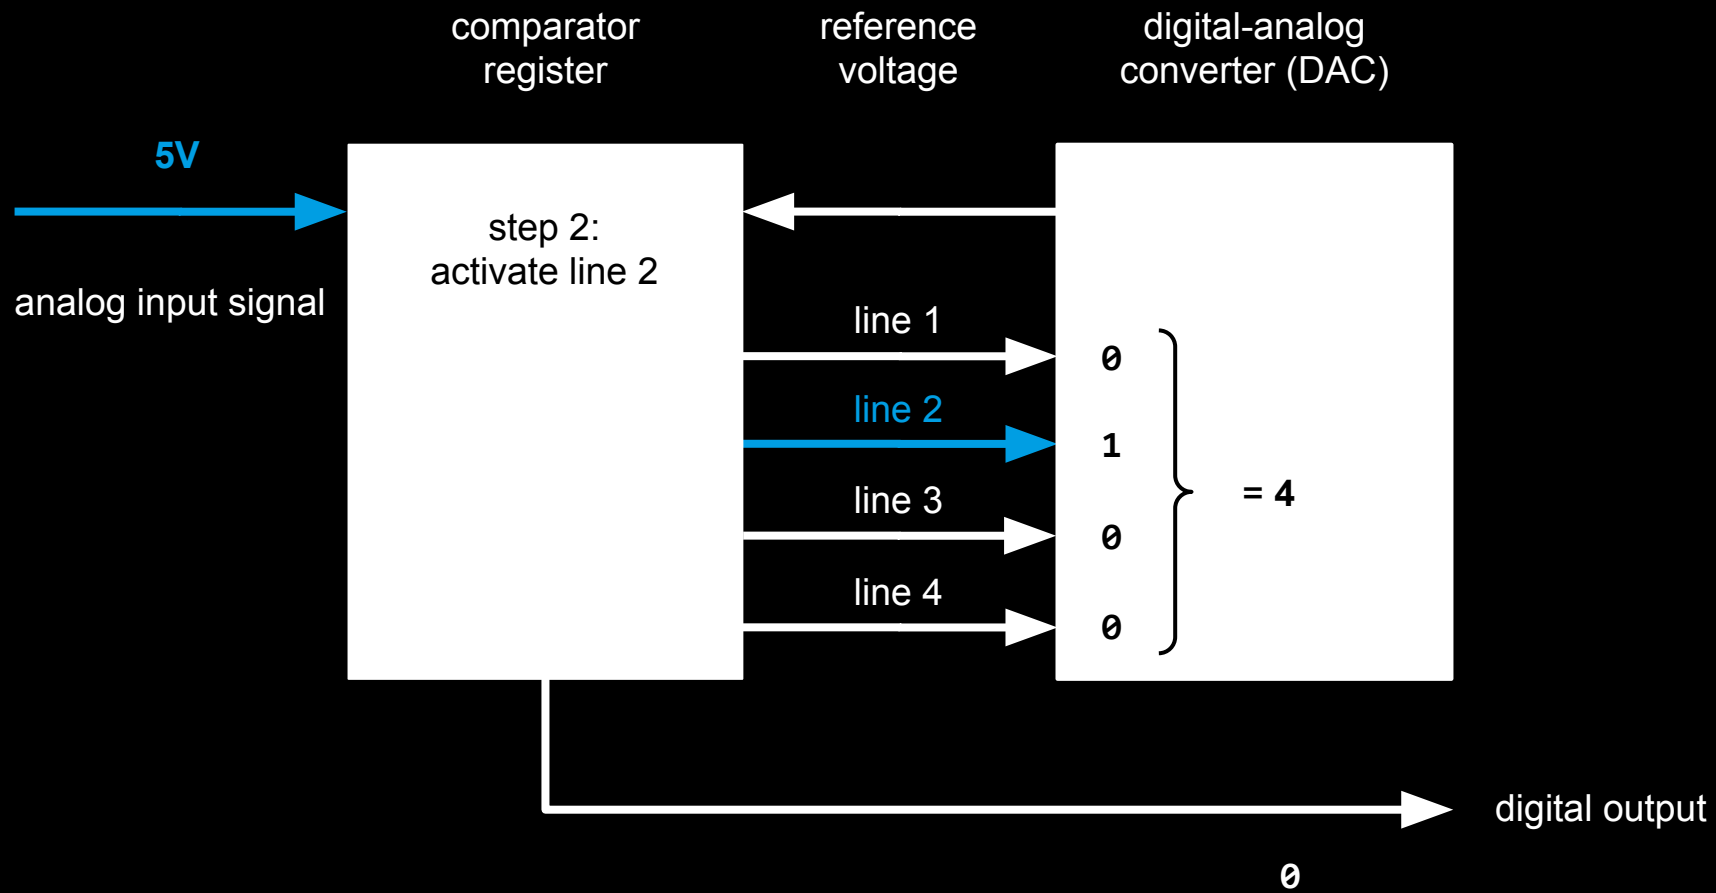

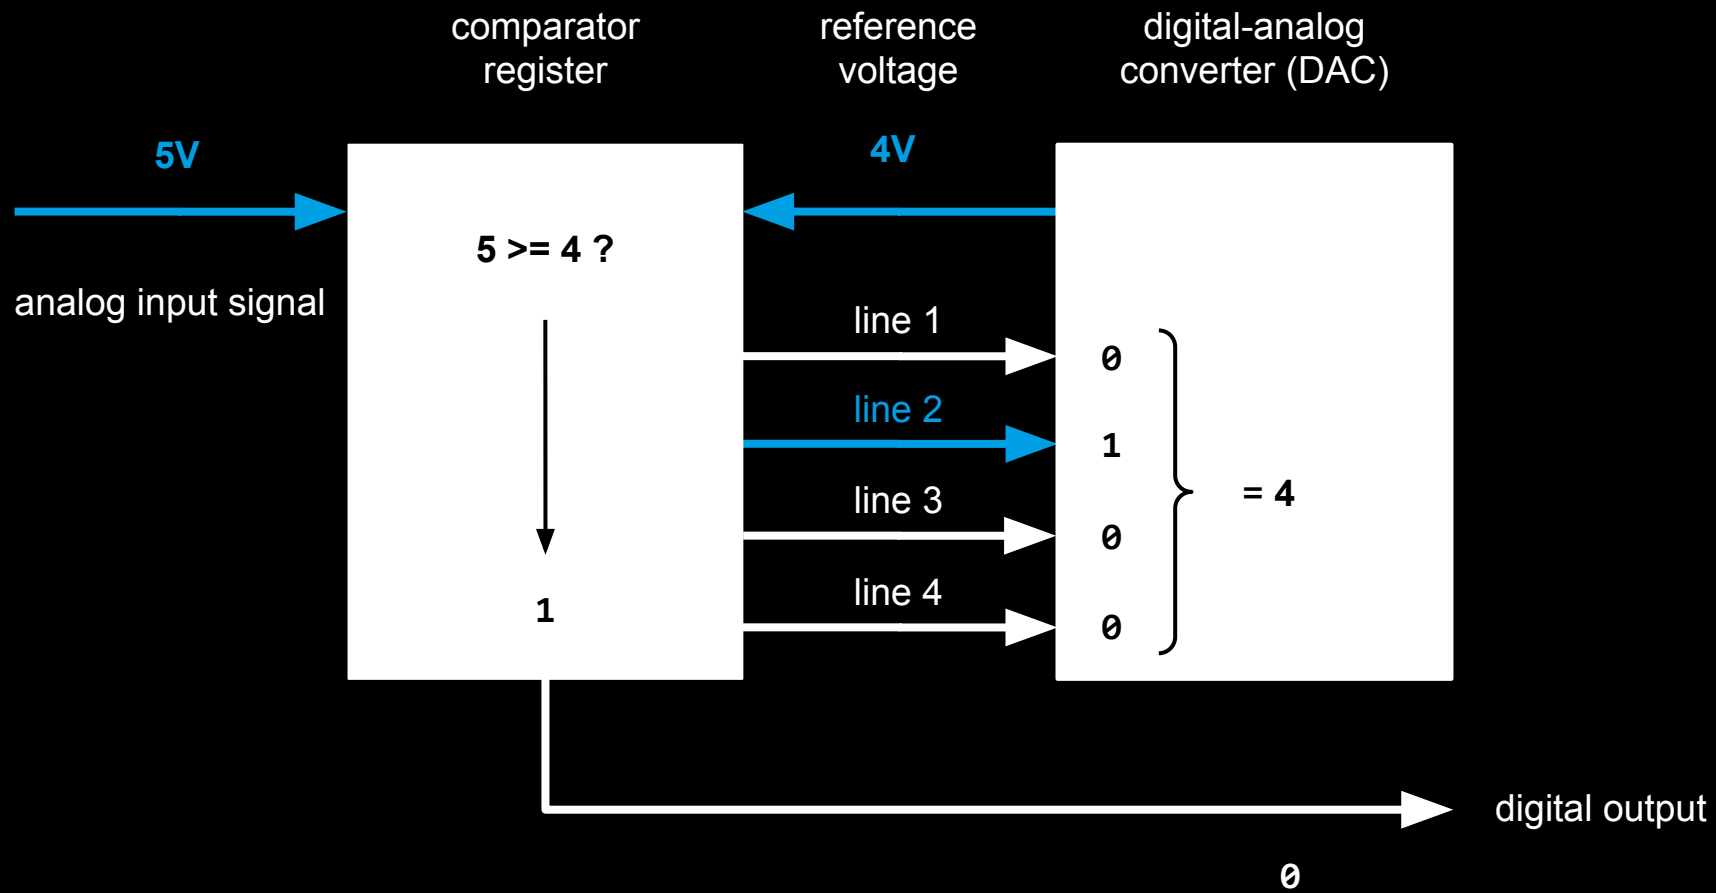

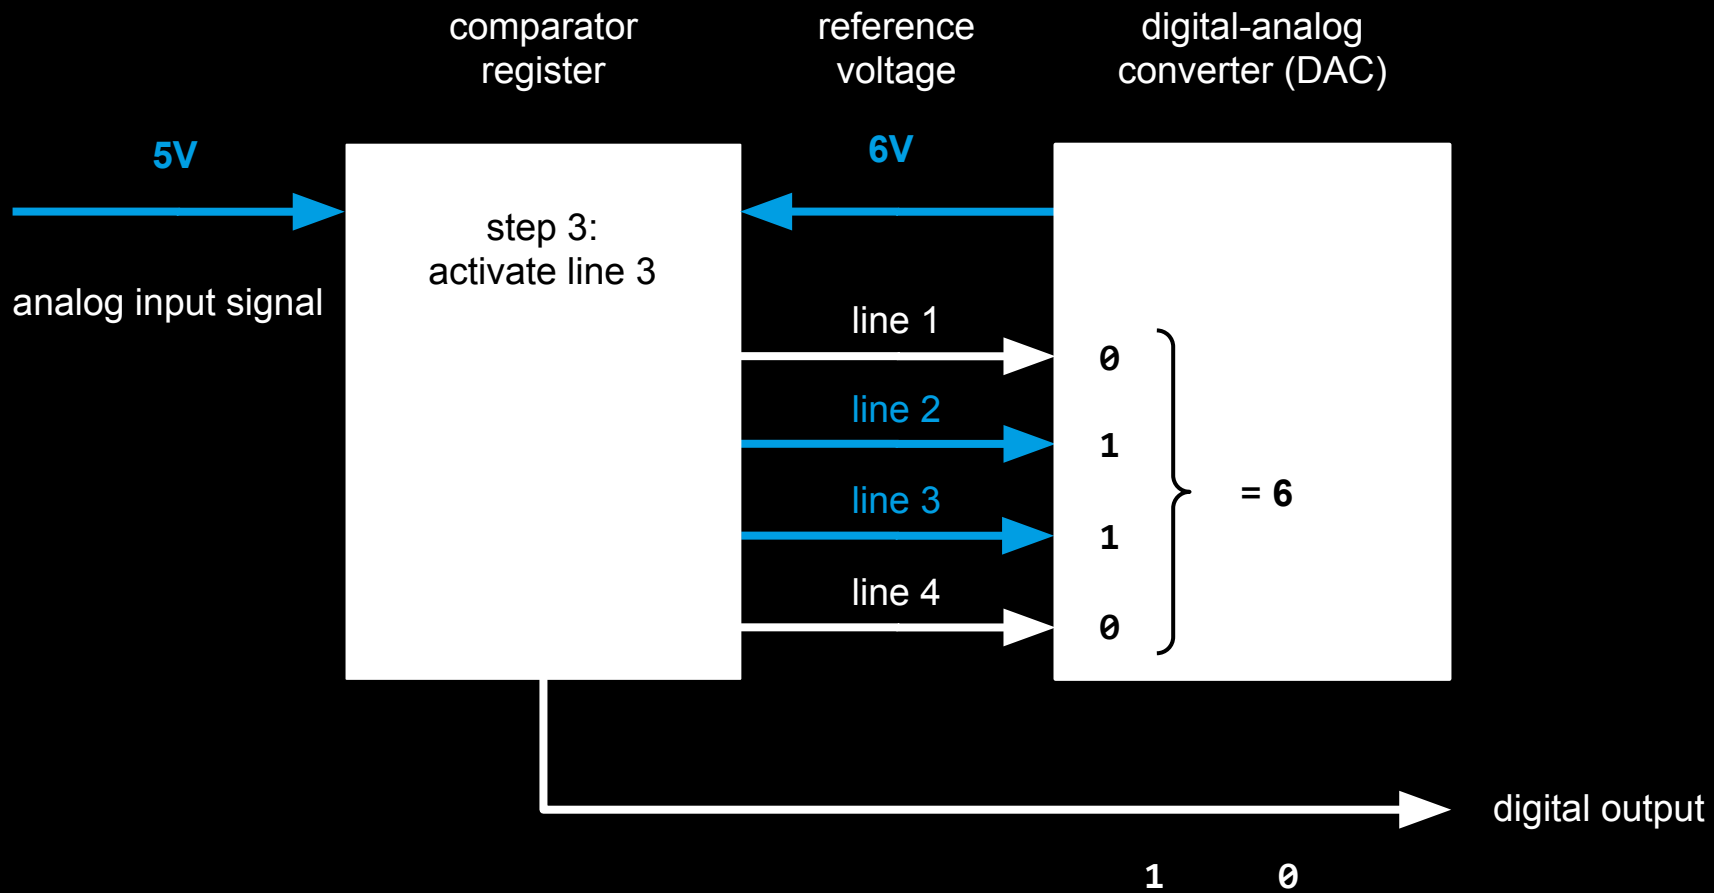

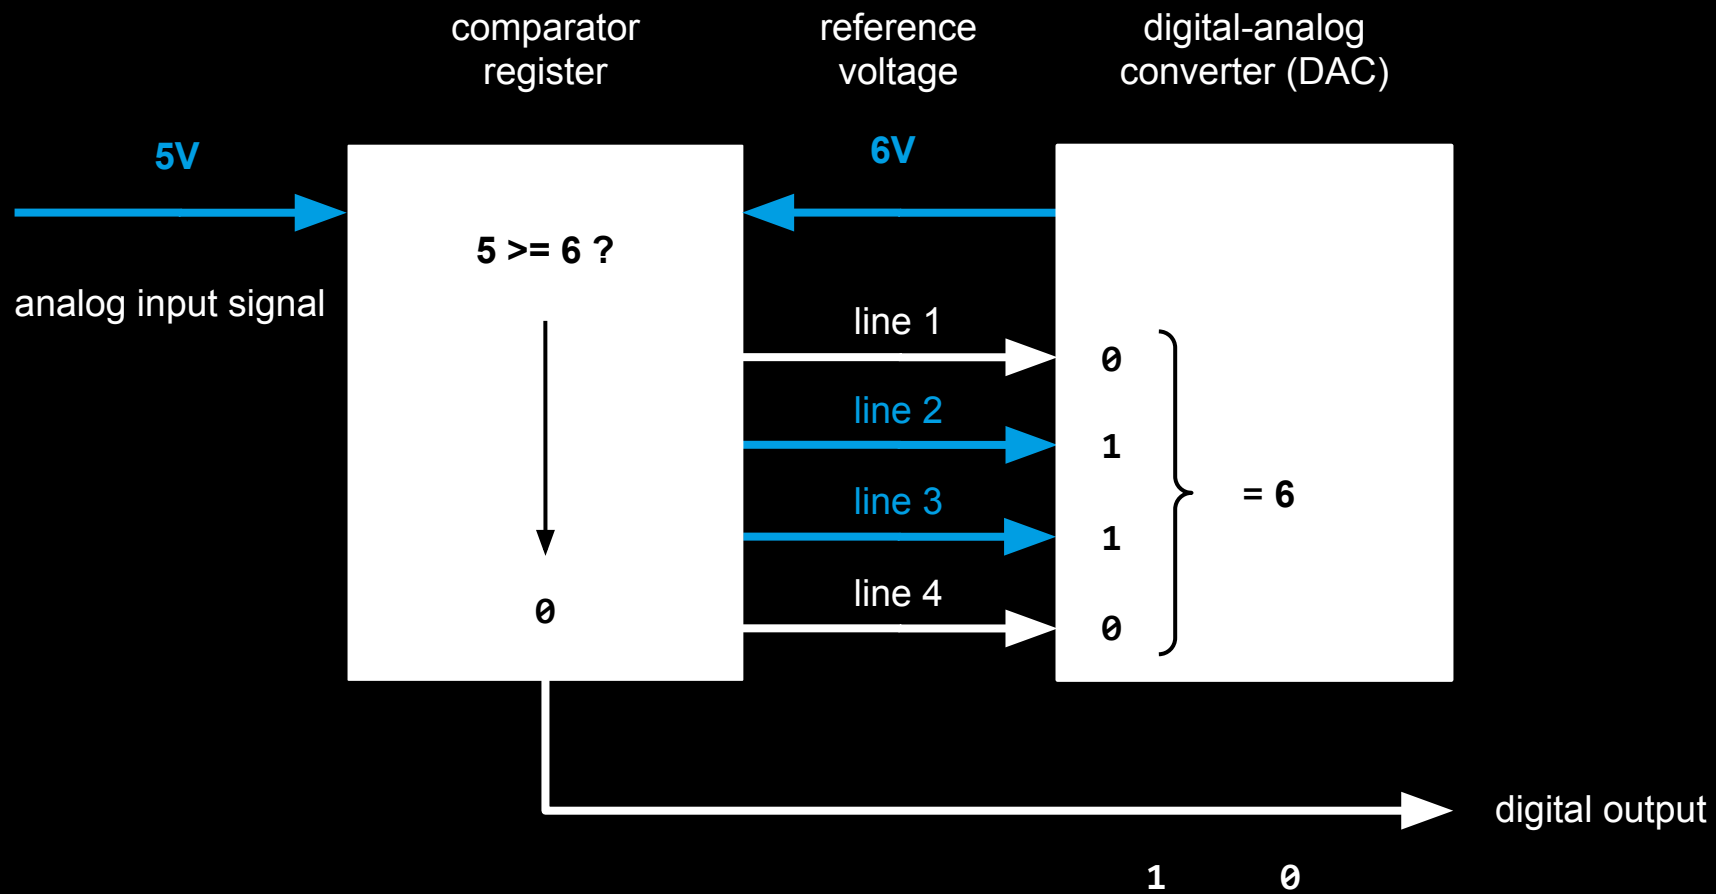

so, what analog signal is measured?

A **continuous** wave is transformed into an array of **discrete numbers** representing pressure.

temperature sensor

A thermometer measures the temperature using a proxy, such as electrical resistance. The result is a change in voltage, which can be converted into a temperature.

```
1100 0101 1101 1110
1001 0110 1111 0100
0000 0111 1111 0001
```
